<b>5.30 PM SCREENINGS</b>				
	WASTE	SUSTAINABLE BUILDING	PEAK OIL & CLIMATE CHANGE	OUR NATURAL WORLD
	<p><b>Squander (NZ) 3 mins</b> Following the life-cycle of advertising material from tree to letterbox. Squander highlights the waste of natural resources to manufacture nothing but pure rubbish</p> <p><b>Xtreme Waste (NZ) 8 mins</b> Reuse, recycle, rejoice! A delightful, upbeat and motivating film about a coastal community that has taken complete control of their waste stream. Be inspired.</p> <p><b>Small Talk Diaries: The Decomposers (UK) 14mins</b> Welcome to ground level recycling. The amusing portrayal of the unsung heroes of our ecosystem – the insect decomposers.</p> <p><b>Just a Lawn (Canada) 13 mins</b> Just a Lawn follows the evolution of the lawn from humble beginnings to an iconic element in the suburban landscape. This lively and fascinating short film explores the link between chemicals, human health and the environment.</p> <p><b>eDump (USA) 20 mins</b> Afloat in the digital revolution, what happens when the latest gadget is trumped and then dumped? eDump is a disturbing yet enlightening exposé along a twisted trail of electronic waste.</p>	<p><b>Sustainability A La Craik (Canada) 25 mins</b> What's a place in the middle of nowhere, totally reliant on agriculture, to do about ecological sustainability?</p> <p><b>The Greening of Southie (NZ) 8 mins</b> A highly entertaining down-to-earth, funny, optimistic film. On the storied streets of Massachusetts, Boston's first residential green building is under construction. A \$75 million luxury apartment tower, made from recycled steel, sustainable hardwoods, and wheatboard cabinetry, the building is a model of energy efficiency and sustainability. Is this the key to solving the global climate crisis?</p>	<p><b>A World without Jam (UK) 12 mins</b> Imaginative members of the Woman's Institute bring the causes and effects of climate change into the home as they contemplate the potential impacts on daily family life. An imaginative gaze into the future.</p> <p><b>Cheat Neutral (UK) 13 mins</b> Two young men launch a cunning corporate parody of the notion that carbon trading is of itself a solution to global climate change. Welcome to Cheatneutral.com.</p> <p><b>The Nuclear Comeback 75 mins (NZ)</b> In a world living in fear of climate change, the nuclear industry has put its hand up as a solution. But is there a risk that we might be jumping out of the carbon frying pan into the plutonium fire?</p> <p>Pemberton takes the viewer on a world wide tour of the nuclear industry; nuclear power is scary, it's expensive, but could it save the earth?</p> <p>A well balanced film in which NZ features heavily</p>	<p><b>Taking Root: The Vision of Wangari Maathai (USA) 81 mins</b> At times brutal, always powerful. A deeply moving film. The inspiring account of the Green Belt Movement of Kenya and its guiding light Wangari Maathai, the first environmentalist and African woman to win the Nobel Peace Prize.</p> <p><b>Papa Tortuga (USA) 19 mins</b> Fernando Manzano has dedicated his life to bringing the lora turtle back from the edge of extinction. In the small town of Tecoluta, Mexico he has battled against mother nature, natural predators and poachers. An uplifting film about communities, conservation and a passion for wildlife and wild places.</p>
<b>8.15 PM SCREENINGS</b>				
FISHED OUT	OUR NATURAL WORLD	ENERGY MATTERS	WATER, WATER EVERYWHERE!	FOOD & COMMUNITY
<p><b>Kai Moana (NZ) 22 min</b> Are our fisheries terminally ill? Who owns all the fish in the sea? One couple in Auckland set out to find out the facts of the matter.</p> <p><b>Fishy Business (Aus) 14 min</b> The illegal fishnet business. Invisible deadly nets dangle deep in seven seas. Despite a world-wide ban, the drift net fishery continues illegally throughout the Mediterranean. Fishy Business uses dramatic footage and informative interviews to compactly document the plight of populations of migratory fish, sea turtles and cetaceans.</p> <p><b>Dangerous Catch (USA) 57 mins</b> A series of strange, seemingly unrelated events are unfolding across the globe. The events are connected by a common theme: over-fishing. Are demands on our oceans impacting life far beyond the shore?</p> <p><b>Cry Sea (Italy) 55 mins</b> Tightly woven documentary investigates the impacts when two economies collide leaving in its wake a way of life.</p>	<p><b>Paradise Found 20 mins</b> In a remote corner of the Pacific lie The Phoenix Islands - the world's largest marine reserve. Paradise Found is an account of the efforts of the Kiribati people and the international community to secure reserve status for these islands. This is an enchanting film dominated by stunning imagery of the marine environment.</p> <p><b>An Alchemy in Green (NZ) 50 mins</b> Barry Brickell's compelling story of determination to restore life to a ravaged land. Artist, railway builder, and nature conservationist; an exploration of the loss then the restoration of the Coromandel bush.</p> <p><b>The Crayfish in the Jam Jar (Germany) 43 mins</b> A wonderfully produced film with stunning cinematography. An intimate portrait of nature and the relationship we share with it. Is anything forever?</p>	<p><b>Cheat Neutral (UK) 13 mins</b> Two young men launch a cunning corporate parody of the notion that carbon trading alone is a solution to global climate change.</p> <p><b>Kilowatt Ours (USA) 55 mins</b> A thought provoking search for solutions that will strengthen the economy, improve the quality of our lives and lead to a healthier environment. An optimistic film with a strong relevance to NZ.</p> <p><b>Bright Ideas 4 mins</b> Can Nelson Boys College be brighter about its energy bill? You bet! The cast and crew take up the challenge with enthusiasm and creativity, reclaiming kilowatts left right and centre with their school wide campaign to educate and motivate change.</p> <p><b>Energy Crossroads: The Burning Need to Change Course (USA) 67 mins</b> A journey along the high road to sustainability, spotlighting renewable energy, coupled with conservation, as sensible solutions for sustaining our quality of life.</p>	<p><b>49 Megawatts (Can) 31 mins</b> After a century of drowning the world's best river valleys, is hydro power actually renewable? This frank documentary by a white water kayaker links rivers and the power that threatens them today in Canada.</p> <p><b>Dirty Secrets (USA) 60 mins</b> The saying "something in the water" rings eerily true in Rob Whittlesey's latest investigative documentary for National Geographic.</p> <p><b>In the Pink (India) 24 mins</b> Is pollution good? Ask the flamingos of Mumbai, thriving in a polluted tidal reach. A stunning film from the sub-continent's pulsing heart.</p> <p><b>Pulp Poo and Perfection (Chile) 15 mins</b> An investigation into the two threats to ocean water quality, local surfers and public health in Chile: sewage and industrial forestry pollution.</p>	<p><b>Earth Film (NZ) 2 mins</b> This micro film from Awatapu College explores the relationship with the Earth as our collective home. A chance to see the work of budding local talent on the big screen.</p> <p><b>Eternal Mash (Netherlands) 53 mins</b> Celebrating a life-long quest to protect and maintain an incredible collection of historic crop species on the brink of extinction. This is Ruurd Walrecht's story, compellingly relayed by a colourful mix of helpers.</p> <p><b>South Central Farm (USA) 24 mins</b> This bursting film is the story of poor migrants, a wealthy developer, and California's biggest city.</p> <p><b>The Sacred Food (USA) 6 mins</b> Who owns indigenous foods? Connect the dots as big business plans to alter traditional wild food crops of North American Indians.</p>
